

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class mjlib_micro_is_error_code_enum["mjlib::micro::is_error_code_enum< moteus::errc >"]
    std_true_type <|-- mjlib_micro_is_error_code_enum
```

The diagram illustrates an inheritance relationship. At the top is a class box for 'std::true_type' with two empty compartments. Below it is a class box for 'mjlib::micro::is_error_code_enum< moteus::errc >' with three compartments, the first of which contains the class name. A blue arrow with an open triangular head points from the top of the lower box to the bottom of the upper box, indicating that 'mjlib::micro::is_error_code_enum' inherits from 'std::true_type'.

mjlib::micro::is_error
_code_enum< moteus::errc >
